Propellants and Fuel Additives

25X1A9a Pursuant to the 16 December 1955 meeting of the EDIC Working Group on Propellants and Fuel Additives, Ann Baldwin of ICA and [redacted] of CIA have sent in lists of questions and topics for you to consider in briefing your military technical experts. Their submissions, along with a set of questions I have prepared, are attached.

All who were present at the meeting have been contacted. Some indicate they will submit their ideas within a day or two. Others prefer to leave the matter entirely in your hands at this point.
